

AVERY EXAMPLE

Software Developer - fictional profile

PURPOSE

This one-page PDF is a deliberately fictional deployment fixture. It verifies that /resume.pdf is served correctly by GitHub Pages.

PLACEHOLDER EXPERIENCE

Placeholder Observatory (2026): an imaginary tool used solely to validate layout, asset delivery, and public deployment.

VERIFICATION SCOPE

HTML route, browser print mode, static PDF download, noindex metadata, sitemap exclusion, and the shared site action bar.

STATUS

Temporary fixture. It will be replaced by an approved real resume after this deployment test passes.
